Education

- Bachelor of Engineering in Computer Engineering – **Covenant University, 2021**

Technical Skills

- Programming TypeScript | Golang | Python | JavaScript | Objective-C | HTML | PHP
- Infrastructures RabbitMQ | Docker | Kubernetes | gRPC
- Frameworks Nest JS | Next JS | React | Fiber | Gin | Django | Svelte | Vite
- IDE VScode | XCode | IntelliJ
- Database MongoDB | PostgreSQL | MySQL | CassandraDB | DynamoDB | SQL | Redis
- Cloud AWS | GCP | Firebase | Digital Ocean | Heroku
- CI/CD TravisCI | CircleCI | AWS CodePipeline | GitHub workflows
- Testing Jest | Mocha | Cypress | PHP Unit
- Web3 Solidity

Experience

FULL STACK ENGINEER | IX NOTE SERVICE LIMITED | 2022 - PRESENT

- Spearheaded integration of Firebase to streamline notification management across web and mobile platforms.
- Executed critical security enhancements on the PXN wallet app, elevating user satisfaction by 60% and reducing security vulnerabilities by 80%.
- Engineered analytics event collection framework, effectively managing data from over 10000 users' interactions.
- Designed and deployed a Slack chatbot tailored for programmer tasks and event management, driving significant productivity improvements for the company.

BACKEND DEVELOPER | CARGLE | 2022 - PRESENT

- Implemented robust security patches resulting in a remarkable 90% reduction in total security issues, fortifying system integrity and user confidence.
- Orchestrated cloud solutions utilizing AWS, Firebase, Heroku, Digital Ocean, and more, delivering substantial cost savings of over 35% per month through strategic optimization and resource allocation.
- Engineered a highly effective dispatch system achieving a dispatch completion rate exceeding 90%, optimizing operational efficiency and customer satisfaction.
- Spearheaded architectural enhancements to the Spikk Deliveries app, culminating in a notable 15% increase in annual revenue by refining user experience and functionality.

FULL STACK DEVELOPER | ITF | 2021 – 2022

- Developed the ITF Board Meeting Software to streamline organizational board meetings and governance, resulting in a monthly cost saving of \$600.

- Provided comprehensive training for entry-level developers, equipping them with essential programming tools and languages to enhance productivity and skill development.

SOFTWARE DEVELOPER INTERN | IX NOTE SERVICE LIMITED | 2020 – 2021

- Developed and deployed the backend infrastructure of the Krakenhaus hospital application, driving a substantial increase in customer satisfaction by 75%.
- Enhanced the readability and comprehensibility of existing projects through meticulous documentation and efficient project management practices.
- Implemented rigorous testing protocols, ensuring the creation of well-written test cases and consistently achieving passing results to maintain software quality standards.

Projects

- PXN eWallet and e-commerce application (mobile and web).
- Krakenhaus hospital management application.
- UsePays online gifting application.
- Aljys microservices API
- ITF Board Management Application
- NESCO mobile application API
- UNICEF Nigeria web application
- Getstac distribution platform
- Jot Exchange trading platform
- Spikk Deliveries application v1.0 and v2.0

Certification

- Udacity ALX-T Cloud developer
- Cisco Certified Network Associate
- Google IT Specialization

Volunteering and Leadership

- Visited an impoverished school and helped them with whiteboards and whiteboard markers.
- An active presence in the Jos developer community.
- A leader in my youth fellowship.
